Pregnancy and Childbirth

Pregnancy and Childbirth. Babies born between 37 and 42 weeks of pregnancy are called full term. Babies born close to full term have the best chance to survive and do well. Labor (childbirth) is when a pregnant woman's uterus contracts and pushes or delivers the baby from her body. The baby may be delivered through the woman's vagina or by cesarean section.

Why do so many women still die in pregnancy or childbirth?

A: In 2015, an estimated 303 000 women will die from complications related to pregnancy or childbirth. In addition, for every woman who dies in childbirth, dozens more suffer injury, infection or disease. The majority of maternal deaths are due to haemorrhage, infection, unsafe abortion, and eclampsia (very high blood pressure leading to seizures), or from health complications worsened in pregnancy.

Why did God punish women with pain in childbirth (Genesis ...

Question: "Why did God punish women with pain in childbirth (Genesis 3:16)?" Answer: A woman's pain in childbirth is part of the suffering brought into the world through sin. As a direct result of the original sin, Adam, Eve, and the serpent were all cursed in one way or another. Genesis 3:16 lists one of the judgments for Eve's sin as pain in childbirth: "I will make your pains in ...

Recovering from birth | womenshealth.gov

Some women develop thyroid problems in the first year after giving birth. This is called postpartum thyroiditis. It often begins with overactive thyroid, which lasts two to four months. Most women then develop symptoms of an underactive thyroid, which can last up to a year.
